Audio Branding Laurence Minsky, Colleen Fahey, 2017-03-03 Audio Branding is a concise, practical guide on the influential world of audio branding - what it is, why it's important, and how it can be used to enhance a brand. Consider the familiar tune of a branded ringtone, the bubbly sounds of Skype, and even the chosen sound bite for a branded car unlocking as the driver presses the key. How do these choices tie into a wider brand identity? Which emotions do they spark, and most importantly, how do these choices enhance brand association with the consumer? Audio Branding delivers fascinating insights into this area of marketing, underpinned by practical step-by-step guidance and cutting-edge research to enhance brand loyalty through user experience. Written by authors who have contributed directly to the development of this field, the book contains an enlightening set of case studies, including companies such as Renault (a surprisingly emotional audio brand) Atlanta Convention & Visitors Bureau (a warm, energetic audio brand), and Michelin (a globally coherent audio brand). Covering issues such as the dominance of audio-enabled devices and the phenomenon of continuous partial attention, Audio Branding demonstrates how brands can infuse sound into so many different aspects of their identity, building in a subtle longevity of brand presence through daily user experience.

Life Support Michael Ascroft, Isabel Oakeshott, 2022-03-08 A truly insightful tour d'horizon - Rt Hon. Jeremy Hunt MP, Secretary of State for Health, 2012-18 Insightful and thought-provoking - Rt Hon. Matt Hancock MP, Secretary of State for Health, 2018-21 Brilliant - Sir Stephen Bubb, director of Charity Futures and the Oxford Institute of Charity A tour de force - Niall Dickson CBE, former chief executive of The King's Fund, the General Medical Council and the NHS Confederation *** How good is the NHS, really? That is the question this book seeks to answer, as the health service emerges from the gravest crisis in its history with more money - but greater challenges - than ever before. During the pandemic, voters made extraordinary sacrifices to save the NHS from collapse. Thanks to these efforts and the dedication and bravery of the NHS workforce, hospitals were able to treat patients with coronavirus, but millions of others lost out. Now an exhausted and depleted NHS workforce faces a huge backlog. The gap between supply and demand for publicly funded healthcare has never been so wide. With record numbers waiting for treatment, the politicians' answer has been to spend ever more taxpayers' money. The question is whether throwing cash at the problem will work. Every day, millions of patients receive care that is fair, good or outstanding. In keeping with Nye Bevan's founding principles, the same treatment is available to rich and poor,

free at the point of need. Public support for the concept remains overwhelming. Yet for every positive NHS experience there are negatives: care that is substandard, disjointed and arrives too late. A cult of secrecy surrounds errors and failings. Politicians on all sides dissemble and lie. This book seeks to strip away the spin and uncover the true state of the NHS: the good, the bad and the ugly. It explores an increasingly urgent question: in an era of pandemics, can the NHS provide the quality of service patients deserve?

The Individual and the Group Malcolm Pines, 2012-12-06 Malcolm Pines and Lise Rafaelsen The Seventh International Congress of Group Psychotherapy organized in Copenhagen by the International Association of Group Psychotherapy was one of the largest and most representative congresses on this subject that has yet been held. Probably for the first time we achieved the declared aim of the International Association: that of bringing together representatives of the different approaches to group psychotherapy in the same forum to allow for communication, exchange, and development of our relationships. Previous congresses have been less representative and it seems to augur well for the future of the Association and of its congresses that there was this strong force and wish for unification and for exchange within the field of group psychotherapy. The Congress theme, *The Individual and the Group: Boundaries and Interrelations in Theory and Practice* was chosen because it gave an opportunity once again to examine the very basis for group psychotherapy as theory and as practice. The basic theme, stated in the opening papers by Professor Marie Jahoda and Professor James Anthony, was replayed daily with new developments and variations according to the theoretical position of each subsequent speaker.

Advanced Decision Making Methods Applied to Health Care Elena Tanfani, Angela Testi, 2012-06-12 The most difficult part of making decisions in the health care field on all levels (national, regional, institutional, patient) is linked to the very complexity of the system itself, to the intrinsic uncertainty involved and its dynamic nature. This requires not only the ability to analyze and interpret a large amount of information but also arrange it so that it becomes a cognitive base for appropriate decision-making. Moreover, decisions in the health care field are subjected to many challenges and constraints: fast change and uncertain outcomes, aging population, increasing citizen expectations, equity considerations and limited resources. Operations research, statistical and economic-related quantitative methods supply these decisions making tools and methodology. The contributed book presents a collection of applications to concrete situations detailing the problem area, the methodology employed, the implementation and results. Each topic addressed in the book will be structured in such a way that an interdisciplinary and wide audience will be able to use the materials presented. As an example the book chapters will address health policies issues, planning health services, epidemiology and disease modelling, home-care modelling, logistics in health care, capacity planning, quality and appropriateness.

Setting Priorities in Health Care M. Malek, 1994-09-06 The dual problems of securing access to health care and containing the increasing costs of health care delivery bring the issue of prioritization to the forefront of health care debates.

This study discusses the implications and consequences of allocating priorities to certain groups.

Who Decides Who Decides? John Spiers,Philip Booth,Neil Russel,2018-04-19 This book makes the case for 'ordinary' people to get the health and social care which the state has promised them for over 60 years but which has not been delivered. What is the case for choice? How can choice be made real for the individual? What impact can genuine, individually financially-empowered choice have on effective funding, purchasing, delivery, and outcomes? How can a genuine market grow and thrive? How can the quest for choice include the large numbers of NHS and social care staff on whom success depends? The book urges individual financial empowerment, through a life-long health savings account for all NHS and social services.

Medical and Dental Space Planning Jain Malkin,2014-07-15 THE UPDATED DEFINITIVE REFERENCE ON MEDICAL AND DENTAL OFFICE DESIGN Medical and Dental Space Planning is an indispensable guide to the myriad of details that make a medical or dental practice efficient and productive. The unique needs of more than thirty specialties, as well as primary care, are explained in the context of new technology and the many regulatory and compliance issues influencing design. Concepts are also presented for ambulatory surgical centers, diagnostic imaging, clinical laboratories, breast care clinics, endoscopy centers, community health centers, radiation oncology, and single-specialty and multispecialty group practices and clinics. A thorough review of the latest dental technology and many creative space plans and design ideas for each dental specialty will be of interest to both dentists and design professionals. Important topics like infection control are top of mind, influencing every aspect of dental office design. An inside look at what goes on in each specialist's office will familiarize readers with medical and dental procedures, how they are executed, and the types of equipment used. Technology has radically impacted medical and dental practice: digital radiography, electronic health records, mobile health devices, point-of-care diagnostic testing, digital diagnostic instrumentation, CAD/CAM systems for digital dental impressions and milling of restorations in the dentist's office, portable handheld X-ray, and 3D cone beam computed tomography for dentists all have major implications for facility design. The influence of the Affordable Care Act is transforming primary care from volume-based to value-based, which has an impact on the design of facilities, resulting in team collaboration spaces, larger consultative examination/assessment rooms, and accommodation for multidisciplinary practitioners who proactively manage patient care, often in a patient-centered medical home context. The wealth of information in this book is organized to make it easy to use and practical. Program tables accompany each medical and dental specialty to help the designer compute the number and sizes of required rooms and total square footage for each practice. This handy reference can be used during interviews for a reality check on a client's program or during space planning. Other features, for example, help untangle the web of compliance and code issues governing office-based surgery. Illustrated with more than 600 photographs and drawings, Medical and Dental Space Planning is an essential tool for interior designers and architects as well as dentists, physicians, and practice management consultants.

Social Work in Health Settings Judith L.M. McCoyd,Toba Schwaber Kerson,2016-03-17 Social Work in Health Settings: Practice in Context maintains its use of the Practice in Context (PiC) decision-making framework to explore a wide range of social work services in health care settings. The PIC framework is used to cover a broad range of social work practice sites, settings and populations over 30 case chapters. The cases cover working with both individuals and groups of clients across the life course and the PiC framework helps maintain focus on each of the practice decisions a social worker must make when working with a variety of clients from military veterans to HIV positive children. The ideal textbook for social work in health care and clinical social work classes, this thought-provoking volume thoroughly integrates social work theory and practice, and provides an excellent opportunity for understanding particular techniques and interventions.
